

A message from Derek

I am an everyday man, who has worked hard in his life. I have had very hard times and I have had good times. But I have always had a passion for truth. I abhor politicians, I know, it sounds a little hypocritical, as I am running. But I am running because I am frustrated. The Politicians keep telling us we are in the same boat. That is rubbish, we are in the same ocean. Some are in yachts, some are in rafts, and some are just wading above water. I am one of those who are just wading above water. I know the plight of those who are being overlooked. I know that there are people that are desperate. People are tired of empty promises from these politicians who come around when it is time to vote, and that basically is the ONLY time their voices are heard. After that the politicians stick to Stormont and do absolutely what they want to do with no real regard for the people, their businesses, their livelihoods. I think that the last two years have been criminal. Businesses have closed, livelihoods have been decimated, For too long we have been distracted fighting each other while multinationals and faceless oligarchs have eroded our rights, destroyed our services, raped our resources. Orange and green politics are gone. We must stand together to defend our children and save our freedom.

The Freedom Alliance on the Island of Ireland is a collection of people, just like you and I, whose mission is to protect your rights with a democratic system in Northern Ireland. We are not a political party, but we work with like minded people across the world, including in the United Kingdom and Ireland. The Freedom Alliance is morally supporting independent candidates who have pledged to work for your inalienable rights. You can view the details of those policies on the website www.freedomallianceioi.com.

Election Communication

Wayne Gretzky said it best: "You miss 100 percent of the shots you don't take." If you don't sign up for the marathon, you will absolutely not complete it. Fear of failure is one of the more dangerous phobias out there: It might be the only fear that guarantees a roadblock to success in all facets of your life".

"Let us run with endurance the race that is set before us"

Democratic Government: We will work to establish democratic systems which will only allow decisions in line with any mandate from the people, determined by either the politicians manifesto commitments or a referendum. All legislation must comply within the constitutional democratic process and the Bill of Rights. I will never accept the surrender of any constitutional rights to foreign powers or supranational bodies.

Sovereignty: Our sovereign and inalienable rights have been trampled into the ground. For too long politicians have told us they can do nothing about it. We the people are sovereign and politicians represent us. No one should be above us, or dictating to our representatives. I will uphold your right to life, bodily autonomy, freedom of religion, freedom of movement, freedom of speech, freedom of association, freedom to own and enjoy your property.

Life of the Unborn Child: We believe the decisions on this issue must be a decision for the people in Northern Ireland and them alone. The undemocratic imposition of laws on such devolved matters is unacceptable and will be stopped. We the people here, through your representatives, will decide. We will look at a referendum on this matter.

Nuclear Waste Dump: Northern Ireland has already been ear marked as a nuclear waste dump, to receive waste from around the world. We will stop this destruction of our country and the ruin of 25% of our land, where prospecting and mining has been planned. We will not allow our land to be destroyed by nuclear waste and toxic chemicals including cyanide and fluoride. We will ensure decisions on these matters will be at Stormont.

Farming: We will ensure farming continues under local ownership. Farmers will have restrictions lifted so as they can make a profit without the need for subsidies. At present laws being passed will mean the loss of about 85% of all animals on our farms in the next few decades. We will protect farmers and prevent this happening.

Sectarianism: I will not be designating as I will serve all the people, not sectarian tribes. Legislation will make culture and language into a political weapon and is counter productive. The past divisions need to be consigned to the dust bin. The continued collapse of Stormont is undemocratic and unsustainable. We will end the undemocratic processes and replace them with democracy. Minority rights can be protected by a Constitutional Court.

MLA Wages: We will be seeking a set wage for all elected representatives. No one elected should receive one penny of additional money for doing their job, including serving on committees, serving as a minister or acting in any other capacity as an elected representative. It should not be a career.

Accountability: We will establish a completely transparent Judge led public enquiry to look at the handling of all aspects of Government over the past three years. If criminal offences are disclosed by those in public office they will be dealt with appropriately. We demand full accountability and an end to corruption in public, statutory, and corporate office.

Policing and Justice: We will reform policing to provide local constables servicing their community, supported by a criminal investigation body and a road policing unit to deal with road policing.

Education: Education will return power over the child solely to the parent/guardian. The estate of the education system will be examined to provide a wider choice for education and at local community level with a targeted curriculum.

Health: We will ensure all health provision as a universal right is equal to all. We will not block private health care for those who wish to avail of it but not at the expense of national health system. We will establish the rights of the individual as paramount in their health care.

Workers Rights: There are a raft of protections for workers in legislation. However, these have been diluted, over complicated, and very often ignored or abused by employers. It is a mountainous task for individuals to put up their own money to hold those breaking the law accountable. We will proactively protect workers' rights by providing a support service to investigate breaches.
